Experience

Data Structures and Algorithms

Jan 2024 – Mar 2024

Board Infinity

Remote

- Learned and implemented 10+ core data structures, including arrays, linked lists, stacks, queues, trees, and graphs.
- Developed 50+ optimized algorithms to solve real-world problems with a focus on time and space complexity using C++.
- Built a Library Management System handling 1,000+ book records and 500+ user transactions, integrating search, issue, and return functionalities for efficient data retrieval and management.

Cloud Computing

Jul 2024 - Oct 2024

NPTEL

Remote

- Gained expertise in cloud architecture, virtualization, and deployment models (IaaS, PaaS, SaaS).
- Explored cloud platforms such as AWS and Google Cloud, learning storage, computing, and security services.
- Designed and implemented a scalable cloud-based application using serverless computing and containerization.

Projects

Jarvis (AI-based Voice Assistant) | Python

Jan 2025

- Developed a voice-controlled AI assistant using Python, integrating Gemini API to enhance natural language understanding (NLU) and context-aware responses.
- Integrated speech recognition using the SpeechRecognition library, achieving 95%+ accuracy in processing voice inputs, and used pyttsx3 for realistic text-to-speech (TTS) conversion.
- Engineered real-time query resolution, news updates, and task automation, reducing manual efforts by 40%.
- Enhanced response time to under 1.5 seconds, ensuring seamless user experience.
- Applied NLP, machine learning, and Gemini API integration to enhance assistant capabilities and interaction efficiency.

Netflix Data Analysis and Interactive Dashboard | Tableau Prep, Tableau Desktop

Oct 2024

- Collected a 20,000+ record Netflix dataset from Kaggle and performed data cleaning & preprocessing using Tableau Prep, resolving 98% of missing values.
- Conducted Exploratory Data Analysis (EDA) to uncover content trends, genre popularity, and regional user engagement patterns.
- Designed an interactive Tableau dashboard with 10+ dynamic visualizations, providing insights into content distribution, watch time, and audience behavior.
- Identified a 15% increase in Netflix Originals compared to licensed content, offering key insights into platform content strategy.
- Refined data transformation workflows, improving processing efficiency by 40% and reducing manual effort.

Certificates

Deloitte Australia Data Analytics Virtual Internship | Forage | [Link](#)

Feb 2025

Data Structures and Algorithms | Board Infinity | [Link](#)

Jul 2024

Become a Data Scientist | LinkedIn | [Link](#)

Feb 2023

Technical Skills

Languages: Java, Python, R-Programming, HTML/CSS

Machine Learning: Supervised (Regression, Trees, SVM, KNN, XGBoost), Unsupervised (Clustering)

Data Engineering and Analytics: Hadoop, SQL, Tableau Prep, MS Excel

Data Visualization: Power BI, Tableau Desktop

Tools/Platforms: Docker, AWS (Basic), GIT, GitHub

Skills: Data Structures and Algorithms, Analytical Thinking

Education

Lovely Professional University

Aug 2022 – May 2026

B.Tech in Computer Science and Engineering – CGPA: 7.95

Jalandhar, Punjab

Sri Chaitanya Junior Kalasala

Sep 2020 – May 2022

Intermediate – Percentage: 96.70%

Hyderabad, Telangana

Sri Chaitanya Techno Curriculum

Jun 2019 – Jun 2020

Secondary Education – CGPA: 10

Hyderabad, Telangana
